2. NEPSE Index · Intraday Overview

The NEPSE index gives a macro view of the overall market session. Rising index with increasing green volume bars confirms broad buying pressure.

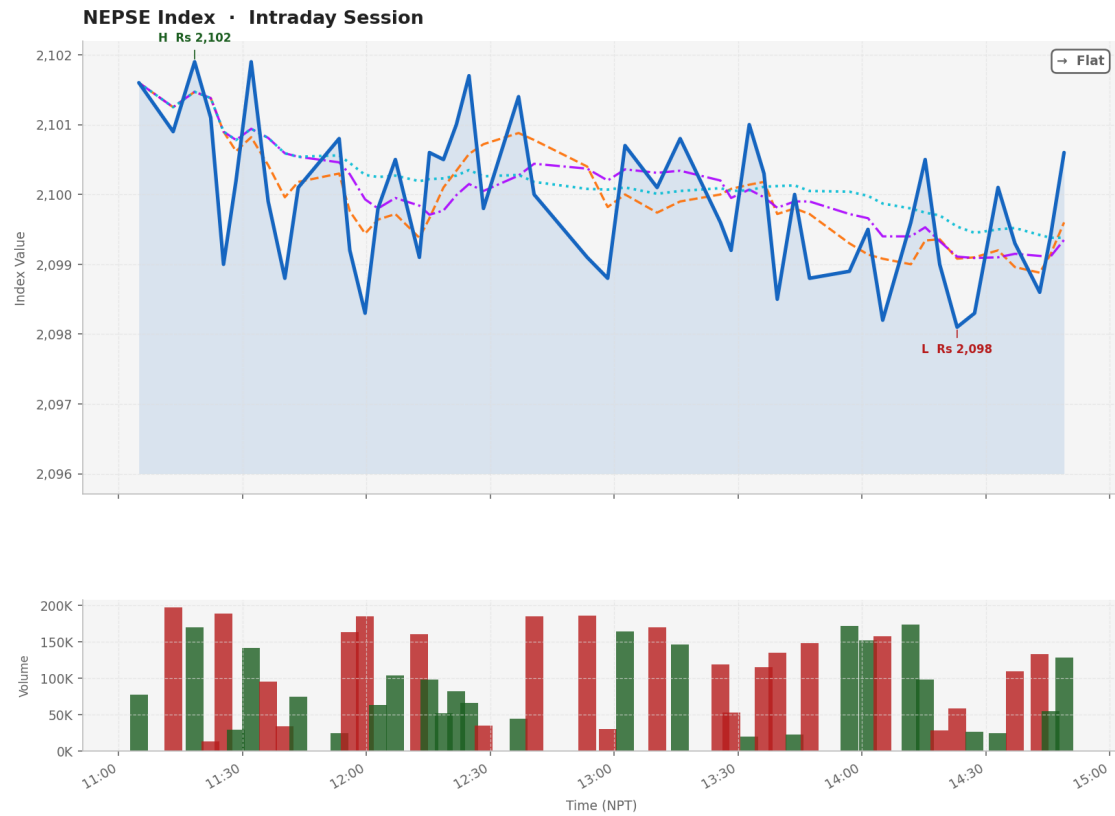

Figure 2 — NEPSE Index: Close, MAs & Volume

3. Close Price Overlay · All Symbols

Prices are indexed to 100 at session open so all symbols are directly comparable regardless of their absolute price level. Deviations signal stock-specific news.

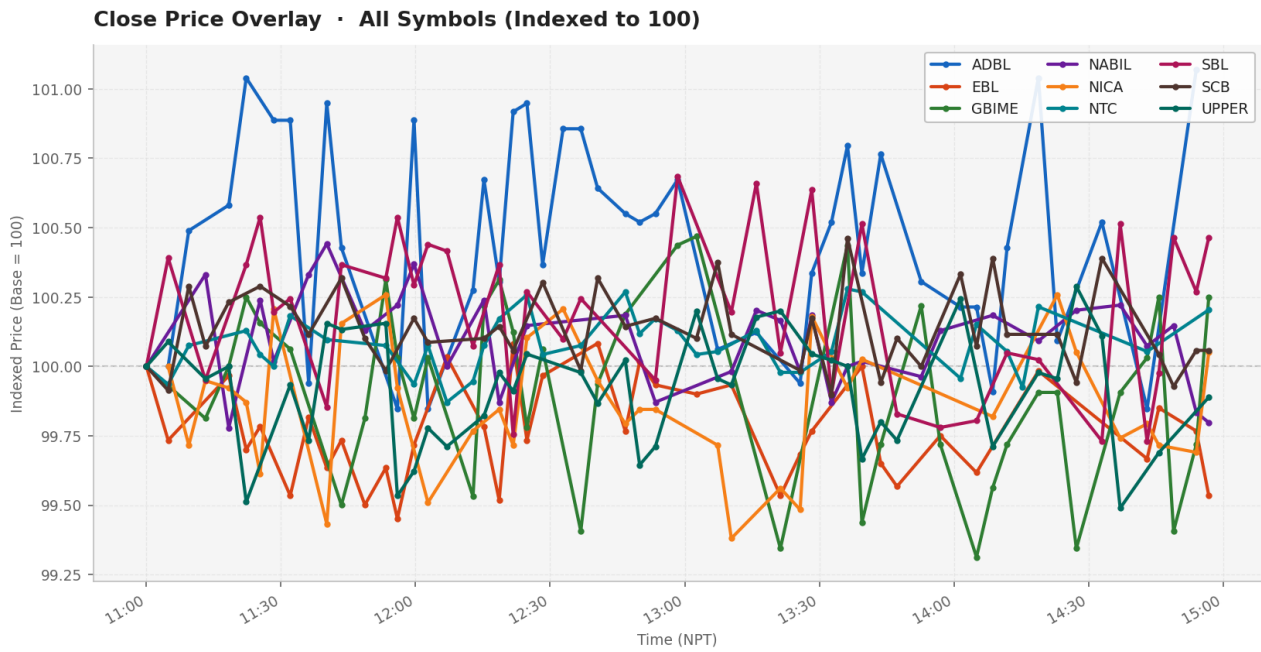

Figure 3 — Close Price Overlay (Indexed to 100)

4. Returns & Cumulative Performance

The % change bar shows each symbol's return vs its previous close. The cumulative chart tracks compounding returns over the full session.

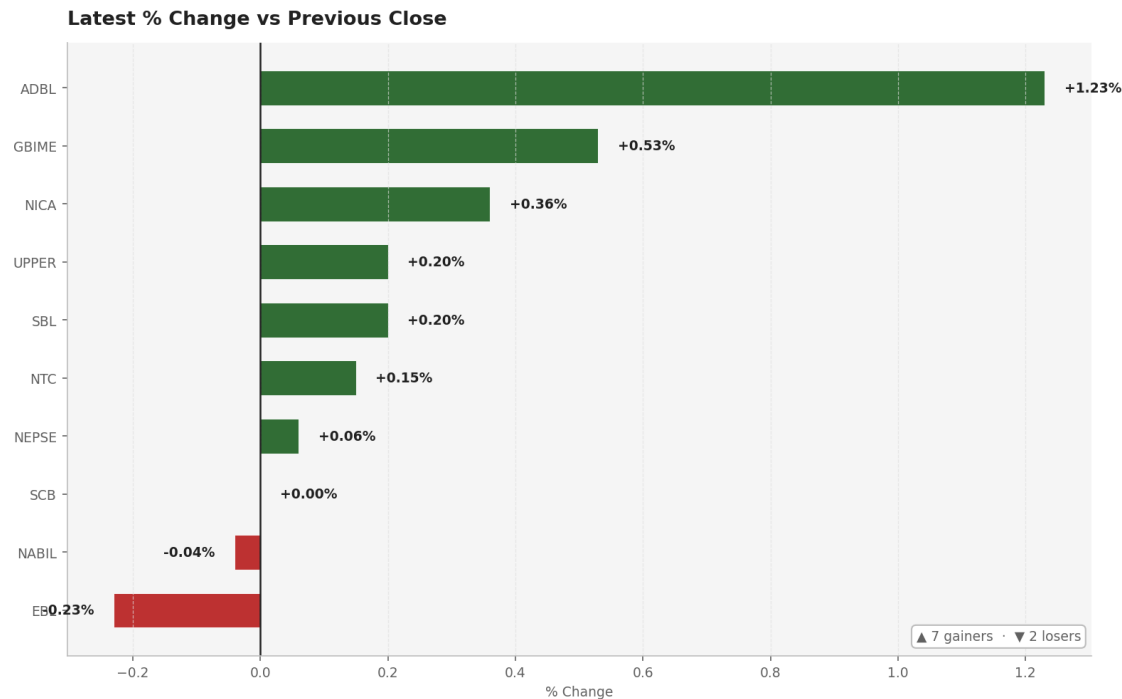

Figure 4 — Latest % Change vs Previous Close

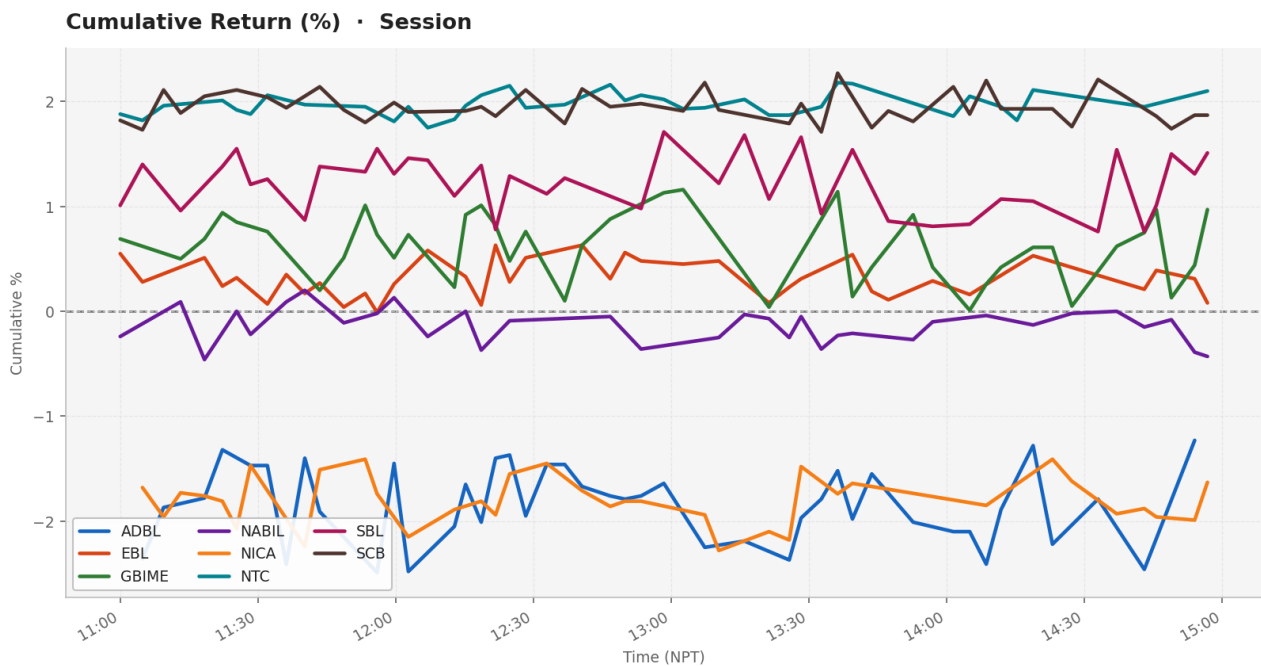

Figure 5 — Cumulative Return (%) Over Session

5. Candlestick Analysis · Top Symbols

Green candles = close $\geq$ open (bullish). Red candles = close < open (bearish). Long wicks indicate price rejection at those levels.

Candlestick Charts · Top 4 Symbols
