Multi-Company Analytics — Price & Returns

Normalised Close-Price Performance (Base = 100 at session open)

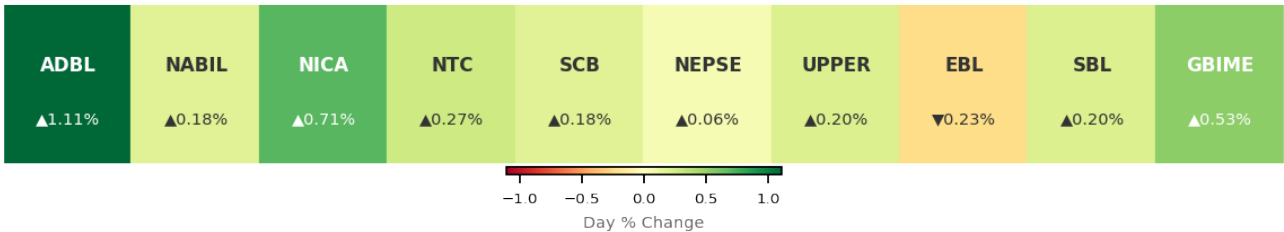

Cumulative Intraday Return (%)

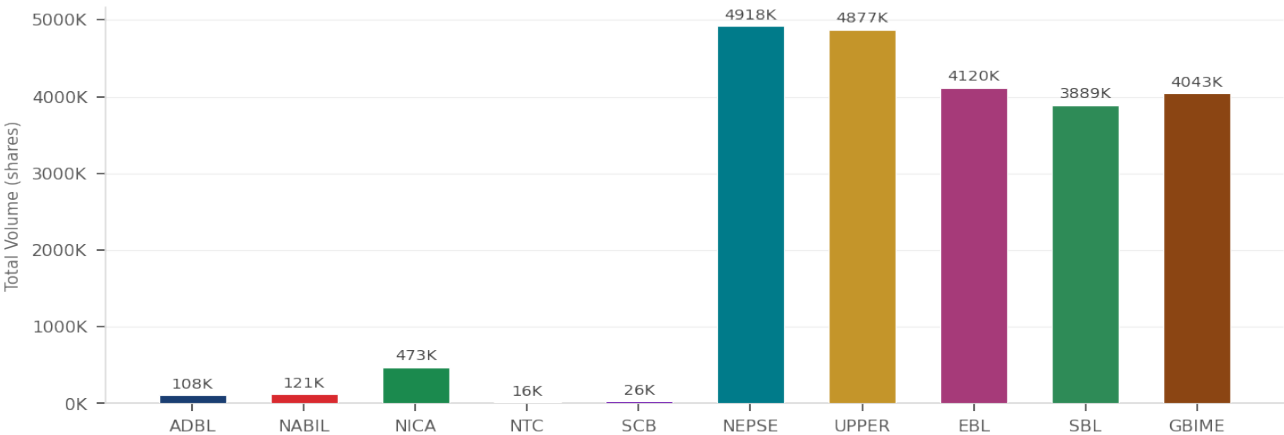

Multi-Company Analytics — Change, Volume & Volatility

Day-Change Heat Map (Green = Gainer / Red = Loser)

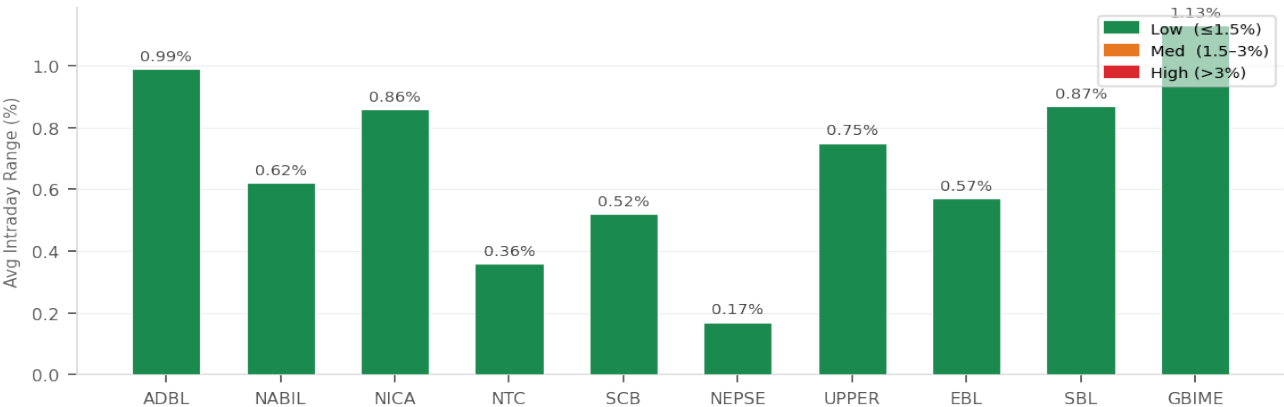

Colour intensity reflects magnitude of day % change. Deeper green/red indicates stronger moves.

Total Session Volume Comparison

Aggregate share volume traded per symbol across all intraday ticks. High-volume stocks typically indicate stronger market participation.

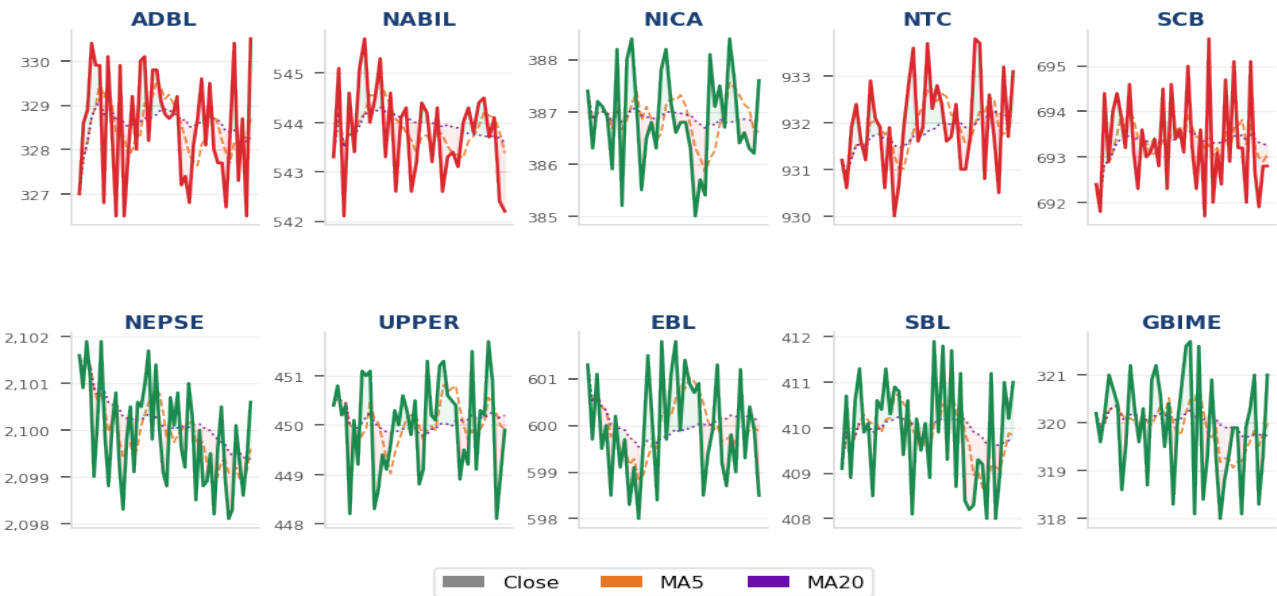

Average Intraday Volatility (Range % = (High – Low) / Low × 100)

Green: low (≤1.5%) Orange: medium (1.5–3%) Red: high (>3%). Higher range % implies wider intraday price swings.

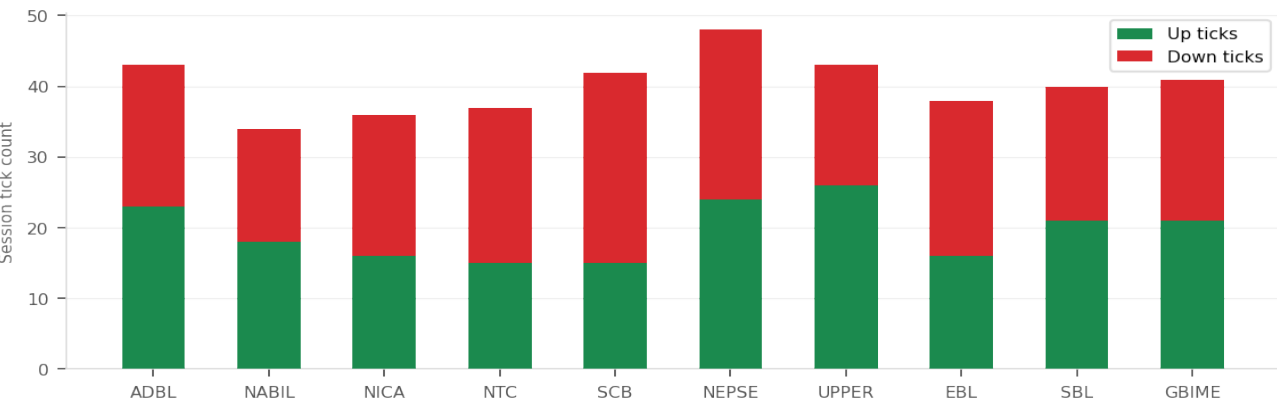

Multi-Company Analytics — Moving Averages & Direction

MA5 / MA20 Band Charts (Small Multiples — one panel per symbol)

Orange dashed = MA5 Purple dotted = MA20 Shaded area shows close price relative to MA20 (green above, red below).

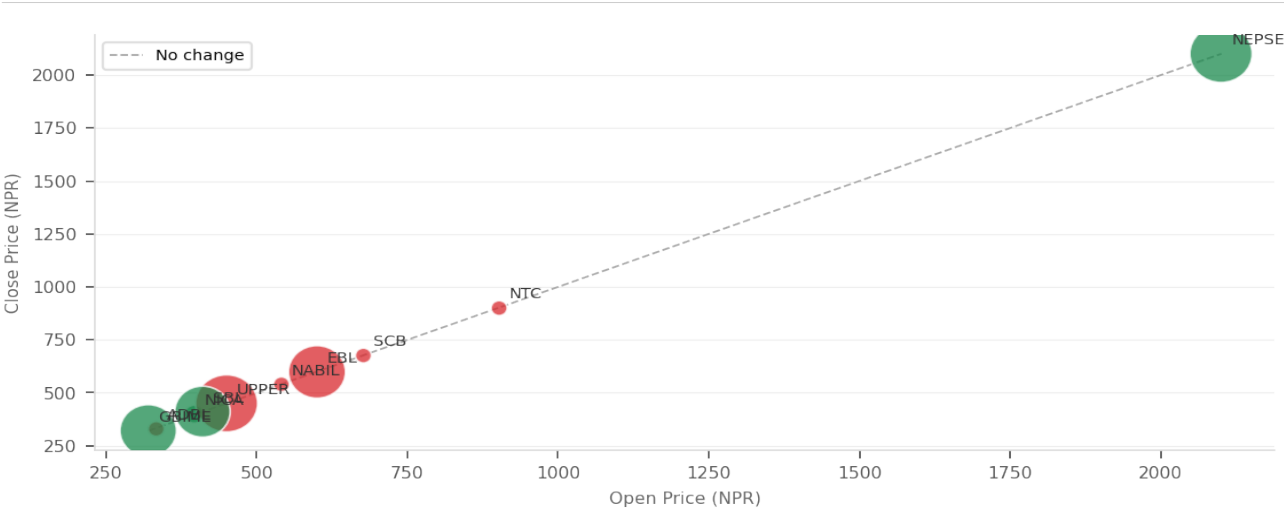

Up / Down Tick Distribution (Stacked Session Count)

Each bar shows the split of up-tick vs down-tick candles for the symbol. Taller green portion = predominantly bullish session.

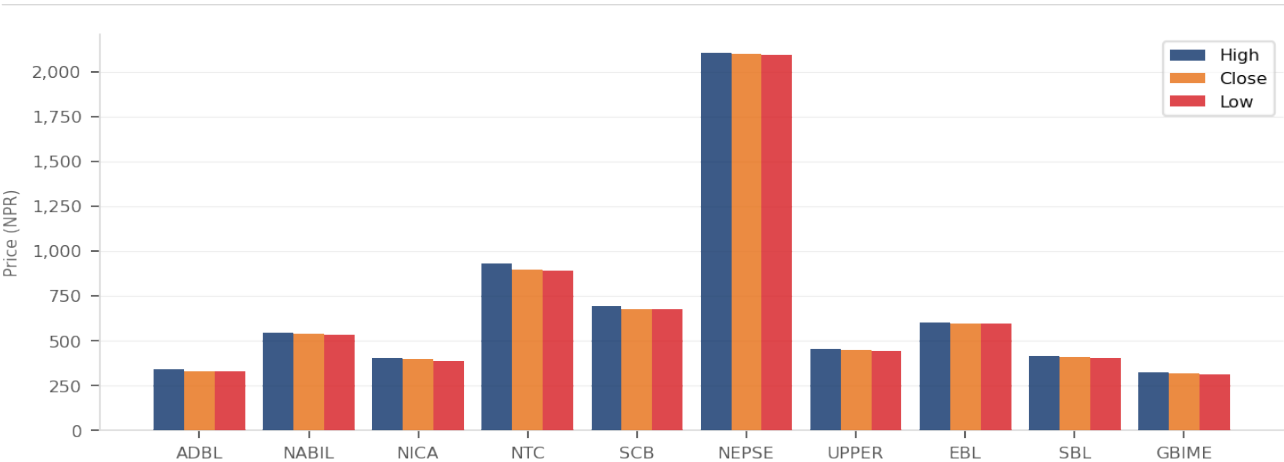

Multi-Company Analytics — OHLC & Price Range

Open vs Close Scatter (Bubble size $\propto$ Volume)

Points above the dashed diagonal = stock closed higher than it opened (bullish). Larger bubbles indicate higher traded volume. Green = net gainer, Red = net loser.

High / Low / Close Price Comparison

Navy = session high Orange = close Red = session low. Width of the spread between high and low bars indicates daily trading range.
